Naim Jabbour

Architecture is a process, a process that creates, molds, and shapes our world. I'm interested in architecture that is sustainable, symbiotic, and regenerative; architecture that captures the essence of space: architecture of experiences and events. My ultimate goal is the advancement of sustainable architecture: a process that entails promoting high performance buildings that are well integrated, energy efficient, and highly sustainable.

"I have been impressed with the urgency of doing. Knowing is not enough; we must apply. Being willing is not enough; we must do."

Leonardo da Vinci
